Web developer who ships and maintains production software. Four self-directed applications run daily at a retail business: a Go/MSSQL price-lookup service behind in-store kiosk terminals, and TypeScript/React desktop apps for cash reconciliation. Each was specified, tested, deployed and maintained solo using AI-assisted development tools, with an automated test suite, a signed installer and auto-update. Professional JavaScript, CSS and WordPress delivery for clients end-to-end, including a 25% page-load improvement and a 405-product catalog built solo. Native English and Turkish.

Core Competencies

- **Professional, day-to-day:** JavaScript, HTML5, CSS3, responsive design, performance optimization, WordPress, Elementor, catalog and e-commerce systems, MailerLite, Git
- **Academic foundation:** Java (Spring Boot, Spring Security, JPA), Python, SQL, MySQL, H2, C/C++, RESTful API design, OOP design patterns, data structures
- **Shipped to production with AI tools:** TypeScript, React, Electron, Go, C#/.NET, WPF, Dart/Flutter, Kotlin/Android, MSSQL, SQLite, PWAs. See Production Projects below
- **Testing, delivery & ways of working:** Vitest, React Testing Library, pytest, dotnet test, flutter test, Go testing; GitHub Actions CI, semantic versioning, signed installers with auto-update; design specs and decision logs written before implementation, tests written to catch AI-generated errors, direct client delivery, mentoring

Professional Experience

- **Self-employed** **Remote**
Web Developer (Freelance) *Dec 2025 - Present*
 - Developed responsive static websites for small businesses, owning the full process end-to-end from design through development and deployment
 - Built a WordPress catalog management system with fully editable products and categories, enabling bulk import of 405 products with images
 - Rebuilt an existing corporate website as a high-performance static site with four-language support, resolving cross-device compatibility issues
 - Manage client relationships directly, from scoping and pricing through delivery and handover
- **SportsID Inc.** **Atlanta, GA**
Web and Mobile Development Intern *Sep 2025 - Nov 2025*
 - Led a 3-person team building a fintech MVP web application, overseeing project planning, task delegation, and technical implementation using AI tools
 - Collaborated with cross-functional teams to deliver core features on time while maintaining code quality and aligning development with business objectives
 - Tracked project progress and managed development workflows to meet sprint deadlines and product milestones
- **NVEEE** **Orlando, FL**
Web Developer *Jan 2025 - Jun 2025*
 - Developed custom CSS and JavaScript solutions that improved page load speeds by 25%, enhancing user experience and site performance metrics
 - Designed and maintained responsive WordPress/Elementor websites, implementing plugin configurations and resolving mobile compatibility issues
 - Mentored 2 staff members on WordPress workflows and managed MailerLite email campaigns

- **Personal Brand** **Remote**
Digital Content Creator & Growth Strategist *May 2023 - May 2024*
 - Created and edited video content generating 4.5M+ views; scaled Instagram from zero to 10,000 followers in 30 days and 10M+ impressions through data-driven content planning

Production Projects

- **Fiyat Gör, in-store price lookup** (Go, MSSQL, PWA, Android/Kotlin). In production at a retail business. One Go service feeds three clients: wall-mounted kiosk terminals on the shop floor, an installable PWA used by staff on their phones, and a JSON API. The kiosk auto-starts on boot with no focusable element, so the on-screen keyboard can never appear and scanner input is captured directly. PIN and token auth, per-IP rate limiting, error masking so database detail never reaches the client.
- **Günsonu, end-of-day cash reconciliation** (Electron, React, TypeScript, SQLite, MSSQL). Used daily by the business owners. Reads each till from the company ERP over read-only queries and computes variances against counted cash, replacing a spreadsheet process and correcting three accounting errors in it. ERP credentials encrypted with Windows DPAPI, never stored in plaintext. Signed installer with auto-update; 130+ automated tests.
- **Kolay Yazdır, Windows printing application** (C#, .NET, WPF). Mixed image, PDF, Word and Excel batches with N-up layout, duplex edge selection and live preview. The layout engine is a pure function with no Windows dependency, shared by preview and printer, so the two cannot diverge. Four-project solution, 290+ passing tests, self-updating installer.
- **Mali Takip, offline cash-flow tracker** (Electron, React, TypeScript, SQLite). Models per-bank settlement delay and commission so funds appear as available only on the day they clear; settings are versioned per record, so changing a bank's terms never rewrites history.
- **Ev Nöbetçisi, rental listing watcher** (Python, 190+ commits). Polls three property sites every five minutes, fuzzy-deduplicates across sources, pushes matches to Telegram. Packaged with pyproject.toml. Tests are written specifically to catch generated content drifting from fact: the build fails if any unverified claim reaches an outgoing message template.
- **Finance Manager, bilingual finance application** (Java, Spring Boot, Spring Security, JPA). Authentication, recurring bill tracking and budget visualization over a RESTful API; deployed to production.

Education

- **Valencia College** **Orlando, FL**
Associate of Science, Computer Programming and Analysis *Jan 2024 - Dec 2025*
GPA 3.80, President's List recognition. Java, Spring Boot, data structures, OOP design patterns, RESTful APIs, databases.
- **TED Aliaga Koleji** **Izmir, Turkey**
High School Diploma *2019 - 2023*
Merit-based full scholarship (USD 60,000 value, top 0.1%).

Leadership, Communication and Languages

- TEDx Youth Speaker (TEDx Youth Bodrum); Model United Nations delegate and chair across 10+ conferences; orienteering team captain for four years
- English (native), Turkish (native).

Honors and Awards

- **Merit-Based Full Scholarship**, TED Aliaga Koleji (2019). Top 0.1%, USD 60,000 value.
- **President's List Recognition**, Valencia College.
