linkedin.com/in/arda-boz ▪ github.com/ardaaboz

Web and software developer based in Izmir. Four applications I built run every day at a retail business: a Go price-lookup service behind in-store kiosks and a staff web app, and desktop apps for cash reconciliation, cash-flow tracking and counter printing. I took each one from specification to production with AI tools, and I test, deploy and maintain them myself. For clients I deliver websites end to end, including a four-language static site, a 405-product WordPress catalog and a 25% page-load improvement. Native English and Turkish.

Core Competencies

- **Professional, day-to-day:** JavaScript, HTML5, CSS3, responsive design, performance optimization, WordPress, Elementor, e-commerce catalogs, MailerLite, Git
- **Academic foundation:** Java (Spring Boot, Spring Security, JPA), Python, SQL, MySQL, C/C++, RESTful API design, OOP design patterns, data structures
- **Shipped to production with AI tools:** TypeScript, React, Electron, Go, C#/.NET, WPF, Kotlin/Android, MSSQL, SQLite, PWAs. See Production Projects below
- **Testing and delivery:** Vitest, React Testing Library, pytest, dotnet test, Go testing; GitHub Actions CI, semantic versioning, signed installers with auto-update, direct client delivery

Professional Experience

- **Self-employed** **Remote**
Web Developer (Freelance) *Dec 2025 - Present*
 - Build responsive websites for small businesses, owning each project from design through development and deployment
 - Built a WordPress catalog with fully editable products and categories, including a scripted bulk import of 405 products with images
 - Rebuilt a corporate website as a fast static site in four languages, fixing its cross-device compatibility issues
 - Work directly with clients from scoping and pricing through delivery and handover
- **SportsID Inc.** **Atlanta, GA**
Web and Mobile Development Intern *Sep 2025 - Nov 2025*
 - Led a 3-person team building a fintech MVP web application, covering project planning, task delegation and technical implementation with AI tools
 - Worked with cross-functional teams to deliver core features on time, keeping code quality high and development aligned with business goals
 - Tracked progress and managed development workflows to meet sprint deadlines and product milestones
- **NVEEE** **Orlando, FL**
Web Developer *Jan 2025 - Jun 2025*
 - Wrote custom CSS and JavaScript that improved page load speed by 25%
 - Designed and maintained responsive WordPress/Elementor websites, configuring plugins and fixing mobile compatibility issues
 - Mentored 2 staff members on WordPress workflows and managed MailerLite email campaigns

- **Personal Brand** **Remote**
Digital Content Creator & Growth Strategist *May 2023 - May 2024*
 - Created and edited video content with 4.5M+ views; grew an Instagram account from zero to 10,000 followers in 30 days and 10M+ impressions through data-driven content planning

Production Projects

- **Fiyat Gör, in-store price lookup** (Go, MSSQL, PWA, Android/Kotlin). One Go service feeds wall-mounted kiosk tablets on the shop floor, a web app used by about ten staff on their phones, and a JSON API. PIN and token authentication, per-IP rate limiting.
- **Günsonu, end-of-day cash reconciliation** (Electron, React, TypeScript, SQLite, MSSQL). Reconciles each till with the company ERP through read-only queries; used daily by the owners. Credentials encrypted with Windows DPAPI, signed installer with auto-update, 130+ automated tests.
- **Kolay Yazdır, counter printing application** (C#, .NET, WPF). Prints mixed image, PDF, Word and Excel batches with several pages per sheet, duplex and live preview. 290+ automated tests, self-updating installer.
- **Mali Takip, offline cash-flow tracker** (Electron, React, TypeScript, SQLite). Shows money in the bank, card payments still settling with each bank, and upcoming payments. Works offline with automatic backups.
- **Ev Nöbetçisi, rental listing watcher** (Python, GitHub Actions). Checks three property sites every five minutes, removes duplicates across sources and sends ranked matches to Telegram. 160+ automated tests.
- **Finance Manager, bilingual finance application** (Java, Spring Boot, Spring Security, JPA). Authentication, recurring bill tracking and budget charts over a RESTful API.

Education

- **Valencia College** **Orlando, FL**
Associate of Science, Computer Programming and Analysis *Jan 2024 - Dec 2025*
GPA 3.80, President's List. Java, Spring Boot, data structures, OOP design patterns, RESTful APIs, databases.
- **TED Aliaga Koleji** **Izmir, Turkey**
High School Diploma *2019 - 2023*
Merit-based full scholarship (USD 60,000 value, top 0.1% of applicants).

Leadership, Communication and Languages

- TEDx Youth Bodrum speaker; Model United Nations delegate and chair at 10+ conferences; orienteering team captain for four years
- English (native), Turkish (native)
